LET US BE YOUR STRATEGIC PARTNER!

We are a team of specialists with a background in digital legal area, information security, cyber security, GRC, project management and data compliance. Our experience comes from roles as in-house or as external consultants in both the public and private sectors, from SMEs to global companies.

We have gathered our experience and developed products that simplify work with data compliance. We have also optimized our internal processes and we work with compliance tools that create value for our customers.

Our services are developed based on

- 1** Best practice i Nordics.
- 2** Many years of professional hands-on experience of our specialists.
- 3** Our customers' needs in a market where companies are expected to have a greater compliance focus and understanding of the massive EU legislation and cyber security threats.

OUR SERVICES - SPECIALIZED PROJECTS

Practical Compliance. Real Results.

We provide specialized consultancy and hands-on solutions across high-stakes areas such as GDPR, DORA, NIS2, ISO 27001, AI-Act/ISO 42001, eldas..

Our projects are designed to support companies in navigating complex compliance requirements by implementing, improving, and evaluating frameworks that align with today's rapidly evolving data protection landscape.

Whether it's technical implementation or organizational policy alignment, our cross-functional approach ensures that each solution is tailored to the real-world needs of your business.

We align every project with:

-  International best practices
-  EU regulatory frameworks
-  National and sector-specific laws

Our methodology is rooted in adaptability. We build flexible, scalable frameworks that can be customized to meet the distinct compliance demands across various industries.

OUR SERVICES - DATA COMPLIANCE INTERIM SERVICES

Our interim data compliance consultants offer a flexible, high-performing solution for managing compliance, improving data security practices, and reducing risks associated with data compliance.

We provide immediate expertise and flexibility, ideal for both short-term and long-term strategic data compliance needs.

We have extensive knowledge of data compliance laws, best practices, and industry-specific requirements.

- ✓ Ensures business continuity**

Stay Ahead of Regulations, Boost Your Compliance level, and Maximize Success

Working with data compliance is an ongoing and often burdensome task.

The evolving regulatory landscape, limited internal resources, and increasing data security expectations make it challenging to stay compliant.

Our mission is to support YOU with clear, practical, and scalable solutions that reduce risk, enhance compliance levels, and ease the operational burden.

Each of our services is created to add the most value to your business.

Our Managing Partner, Olga Nielsen advises you to

Remain vigilant and proactive, stay ahead of evolving regulations, and make data compliance a priority to ensure a lawful, secure, and ethically responsible environment for data compliance within your organization.
