

A background image showing a person from behind, sitting at a desk in a modern office with large windows. They are looking at several computer monitors displaying data and charts.

Your Business Runs on Access. Make Sure It's Secure.

Your business runs on dozens of tools.
But do you know who has access to them?

**With FlashX, you stay in
control in a simple and
secure way.**

Developed & hosted
in Germany

Zero knowledge
by Design

GDPR
Compliant

1

Most cyberattacks don't start with sophisticated hacks. They start with **everyday access**.

2

Passwords and credentials are the #1 attack vector for businesses of all sizes — including yours.

3

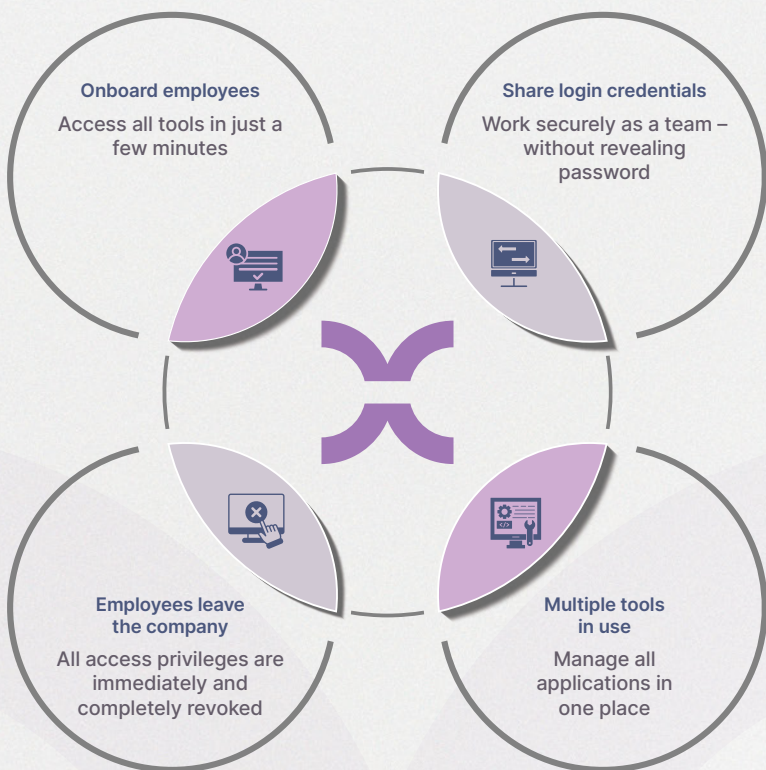

60 billion stolen login credentials are circulating on the dark web.

4

The financial damage from credential-based attacks runs into **the billions** every year.

Manage all your access centrally — *easily and without the chaos*

FlashX brings passwords, access rights, and identities together in one central platform.

MORE VISIBILITY · LESS EFFORT · LESS RISK

This is what everyday work looks like in many companies:

- Employees use multiple tools and manage numerous accounts
- Passwords are reused or shared in an insecure manner
- Former employees retain access to systems
- No one has a complete overview of all accesses

The consequences

- Wasted time and unnecessary IT effort
- Uncertainty regarding critical access
- Increased risk of data loss
- Frustration within the team

A single compromised account can be enough to unlock multiple systems. And the attack probability keeps growing, driven by SaaS tools, automation, and AI.

Everything you need for *secure and easy access* management

- 📄 FlashX combines password management, access control, and security into a single, centralized solution—easy to use and ready to go from day one.

Key Benefits

Less Effort

Manage passwords and access centrally. No more spreadsheets or coordination chaos.

Efficient Process

Onboarding, offboarding, and access control run structured and fast.

Full visibility

See at any time who has access to which systems and data.

Fewer Risks

Eliminate weak passwords, unclear access rights, and security gaps.

- **Centralized Password Management**
Store and use your login credentials securely, with autofill for all applications.

- **Integrated MFA & Security Policies**
Secure every login and enforce clear security policies.

- **Access Control (RBAC)**
Make sure that every employee has access only to what they really need.

- **Onboarding & Offboarding**
Quickly set up new employees and revoke access immediately when they leave.

- **Overview & Monitoring**
Keep track of all access and activity in one place.

- **Access on all devices**
Use FlashX in your browser, on your desktop, and on mobile devices, wherever you work.

Why flashX?

- 🏠 Developed and hosted in Germany (Open Telekom Cloud)

- 👤 Works with the tools you already use

- ➡ Ready to use immediately – no infrastructure investment needed

- 🛡️ Zero-knowledge encryption – only you have access to your data

Get your access under control from today

Get started in just a few minutes. No IT project. No complexity.

- 📄 Get a better overview and save time right away.

- 📄 Easy to set up and ready to use.
