DECISION

Risk-based prioritisation
Investment decisions
Executive reporting

**REGULATORY
CONFIDENCE**

**DATA
PROTECTION
CLARITY**

**PRIORITISED
SECURITY
INVESTMENT**

**OPERATIONAL
RESILIENCE**

When risk is your business, your own cyber exposure can't be the gap you miss. How do you:

- understand your own cyber exposure?
- protect the data your business depends on?
- meet growing regulatory obligations?

Cordaata gives insurance organisations:

- A quantified, financial view of cyber risk exposure
- Risk prioritised by business and operational impact
- Visibility across interconnected systems and data

Key Features

- Highlight critical systems and sensitive data
- Document critical processes and workflows
- Align to regulatory requirements
- Map control effectiveness
- Quantify financial and regulatory exposure
- Assess risk by data and operational impact
- Track and report residual risk over time

Key Benefits

- A shared view of where you stand today
- A clear roadmap of what to do next
- Alignment across the business
- Spend where it reduces the most risk
- Fewer disruptions to business and customers
- Protect reputation and regulatory standing

Strategic Outcomes

Cordaata gives insurance organisations a clear, structured way to understand and manage their own cyber risk.

- Cyber risk maturity that matches your core business
- A defensible position with regulators and auditors
- Greater trust from customers and partners
- A business that leads by example on risk
- Faster, more agile response to emerging risk

**Manage your own cyber risk with the same discipline and
rigour you bring to your clients.**
